Faster Hoppers

Faster Hoppers

Need your items moved faster? All hopper upgrades are **craftable** — the slowest version is the good ol' vanilla hopper, and every level up uses the previous crafted hopper as the base of its recipe.

Faster Hoppers crafting

Speed Tiers

Each tier moves more items in a single transfer than the last:

Tier	Items transferred at a time
Vanilla	1
Slowest	5
Slower	8
Slow	12
Fast	16
Faster	20
Fastest	24
Extreme	64

Crafting

Craft each tier by surrounding the previous crafted hopper with its tier-specific materials and redstone — the gif above shows the full crafting tree. Start with a vanilla hopper and keep upgrading to reach Extreme.
